A GUIDE TO PRIMARY AND SECONDARY PROCESSORS IN ARKANSAS

March 2008

# Forest Industry Directory

# BY MILL TYPE

Since its last release in December 2006, Arkansas has witnessed the closure (including both temporary and permanent closures) of over 70 wood processors according to Directory listings. However during this same period several new mills have begun operation. The March 2008 directory lists a total of 397 wood processors operating in Arkansas.

Every effort has been made to include all wood processors operating in Arkansas in this directory. If your wood processing company is not listed, or the information is incorrect, please use either the AFC comment section on our home page to provide us with the correct information or contact the AFC at 501-296-1940. It is not our intention to leave any wood processing company out of this directory.

## DEFINITIONS

### PROCESSOR TYPE

Industries are classified as either primary or secondary processors. "P" indicates a primary processor which processes logs predominately. "S" indicates a secondary processor which is involved in a value added process.

### CAPACITY

Capacity, defined as the maximum amount of wood that can be processed at a given facility, is given for each processor. Note that capacity is based on Doyle Log Scale or board feet lumber tally.

### Capacity Categories

- A = less than 1 MMBF
- B = 1 - 2.9 MMBF
- C = 3 - 4.9 MMBF
- D = 5 - 9.9 MMBF
- E = 10 - 14.9 MMBF
- F = 15 - 20 MMBF
- G = over 20 MMBF

### MILL TYPE

Processors were grouped into the following mill/plant categories.

PRIMARY PROCESSORS	
Brokers	Paper mills
Chip mills	Plywood mills
Container/pallet mills	Post/pole mills
Flooring mills	Reman. mills
Handle mills	Sawmills
OSB mills	Shaving mills
SECONDARY PROCESSORS	
Bag plants	Misc. products
Brokers	Mulch plants
Cabinet plants	Panel mills
Charcoal plants	Pellet mills
Container/pallet mills	Planer mills
Engineered wd plants	Post/pole mills
Finish mills	Reman. mills
Flooring mills	Shavings mills
Furniture plants	Treating mills
Lamination plants	Truss mills
Log home mfg	Turning mills
Millwork facilities	Veneer mills

In this directory, a total of 229 processors are categorized as primary processors and a 168 processors are listed as secondary processors. At some facilities more than one processing operation may occur. For instance, some container/pallet mills incorporate sawmills into their facilities. When this occurs, the facility is listed in each category (a container/pallet mill which operates a sawmill is listed as a sawmill and a container/pallet mill).

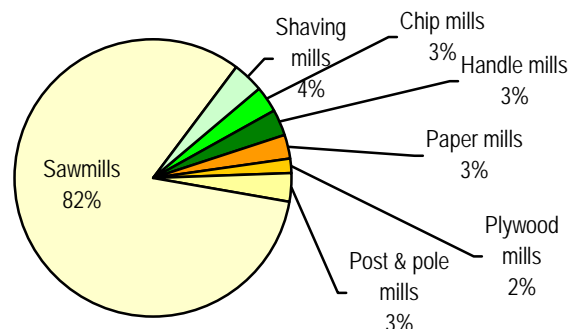

Figure 1. Primary wood processing facilities by type.

LISTINGS WERE LAST REVISED JUNE 2008.
